PICKER PARTS

COMPANY PROFILE

Our company specializes in the production of polyurethane cotton picker parts for John Deere and Case IH cotton Harvesters. We are in the cotton industry since 1992 and serve the needs of the farmers in the local and international market.

COTTON PICKER PARTS ►

Case IH and JD Doffers

We manufacture premium quality of John Deere and Case IH Doffers. Our doffers with the firm EP are well known for their quality among the farmers. They are made of polyurethane ensuring the non-contamination and exhibiting abrasion resistance

according to DIN 53516, as low as 18 mm³. They are better than the old rubber doffers, black and white, that shed rough during the picking process and trashes can get caught into the cotton fibers, contaminating them and remaining there even after the ginning process.

COTTON PICKER PARTS

We use the finest raw materials to manufacture high quality parts that exhibit:

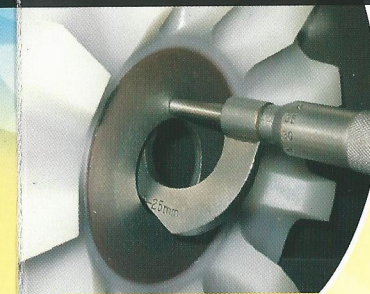

- ▶ excellent performance
- ▶ long life span
- ▶ high durability

PARTS

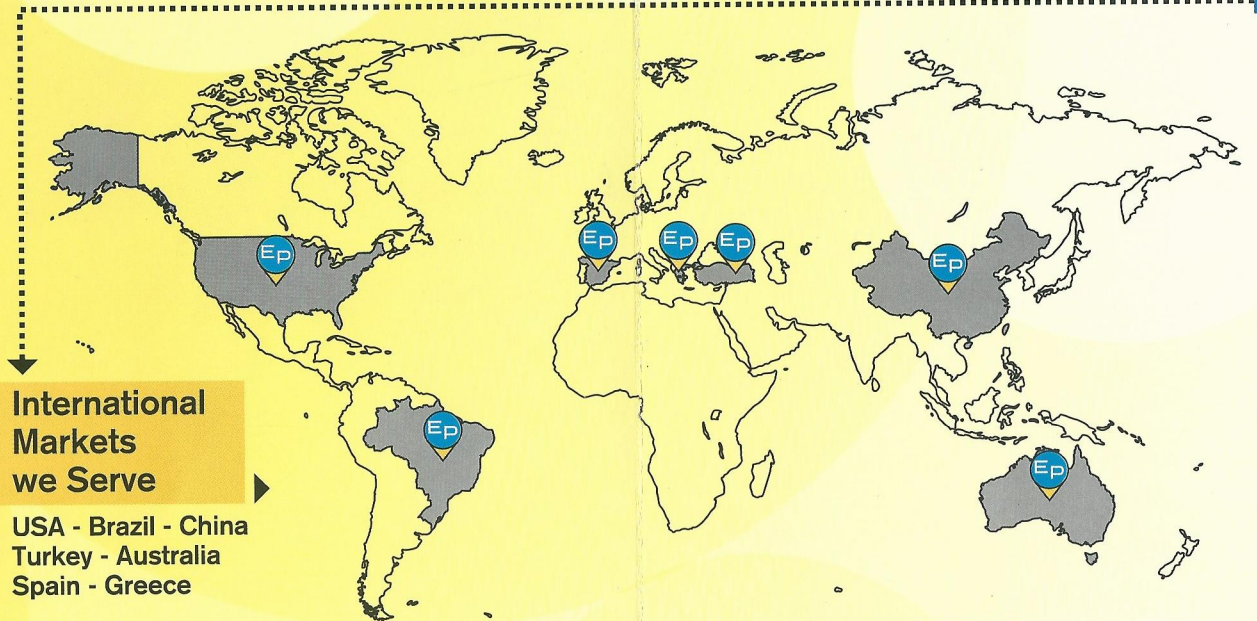

Moisture Pads for JD and Case IH

Excellent quality moisture pads made with full cell modern machines and the best polyurethane system.

Quality control

We take our work seriously and so do the quality of our products! Every doffer and pad are checked during the production and are sent in our quality control lab to examine every aspect of their function. Our lab experts make sure that each and every product meet our high requirements as per ISO 9001:2008 certification.

International Markets we Serve

USA - Brazil - China
Turkey - Australia
Spain - Greece

▼ Die Casting Machine

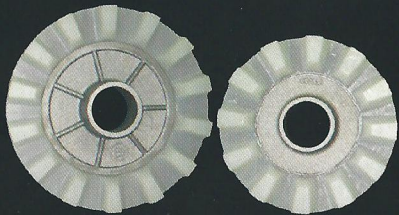

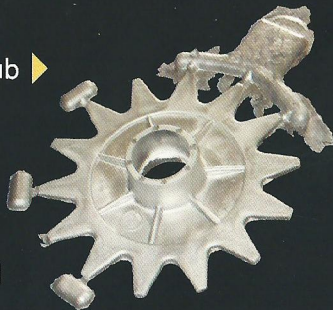

PRODUCTION LINE

We have a complete production line with cutting edge technology machines from die casting to final product. Our technicians follow the manufacturing process and ensure the quality of the final product.
