

EUROPARTS
POLYURETHANE ELASTOMERS

Company Profile Company Profile

At a glance

Urethane cast experts: We specialize in producing urethane casting elastomer parts with a wide variety of applications.

With a long history of outstanding quality, superior product performance and excellent customer service, Europarts is a trusted provider of polyurethane parts, ranging from low quantity prototypes to full production products.

Innovations: In partnership with our designing division, we can mold, design and manufacture a wide range of high quality products that meet strict specifications and high tolerances. We strive to employ the latest technology from design to delivery, enabling us to produce quality parts on time.

Quality Control

With a fully equipped laboratory, our lab experts make sure that every product meets the criteria our clients set. The laboratory expands our research capabilities and allows us to meet our clients' unique needs.

The quality of every single product is monitored during the production and then is double-checked in the lab.

We work one to one with our customers bringing solutions to a variety of industries and delivering top quality parts designed to provide the best overall performance and longest lifespan.

Certified with ISO 9001:2008

Exhibitions

Mid-South Farm and Gin Show, Memphis, TN, USA

Mining Conference and Trading Exhibition,
Litochoro, Greece

You name it, we make it!
We manufacture whatever you imagine!!!

Material Material

Custom urethane products exhibit important advantages over conventional elastomers and plastics.

They are stronger, tougher, durable and versatile.

These products are cost effective, saving money on replacement and reducing downtime.

A few of the material's qualities:

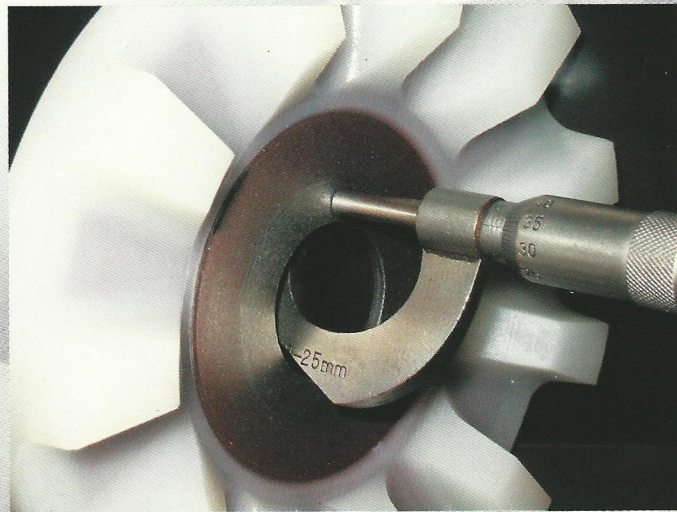

- Highly resistant to wear, abrasion, solvents and cuts
- It can be manufactured to any point on the durometer scale, from very soft to hard-rock
- It withstands excessive temperature changes
- It can be manufactured to a wide variety of colors
- It reduces noise levels
- It exhibits high bearing load capacity

Industries we serve Industries we serve

Agriculture industry

Doffers

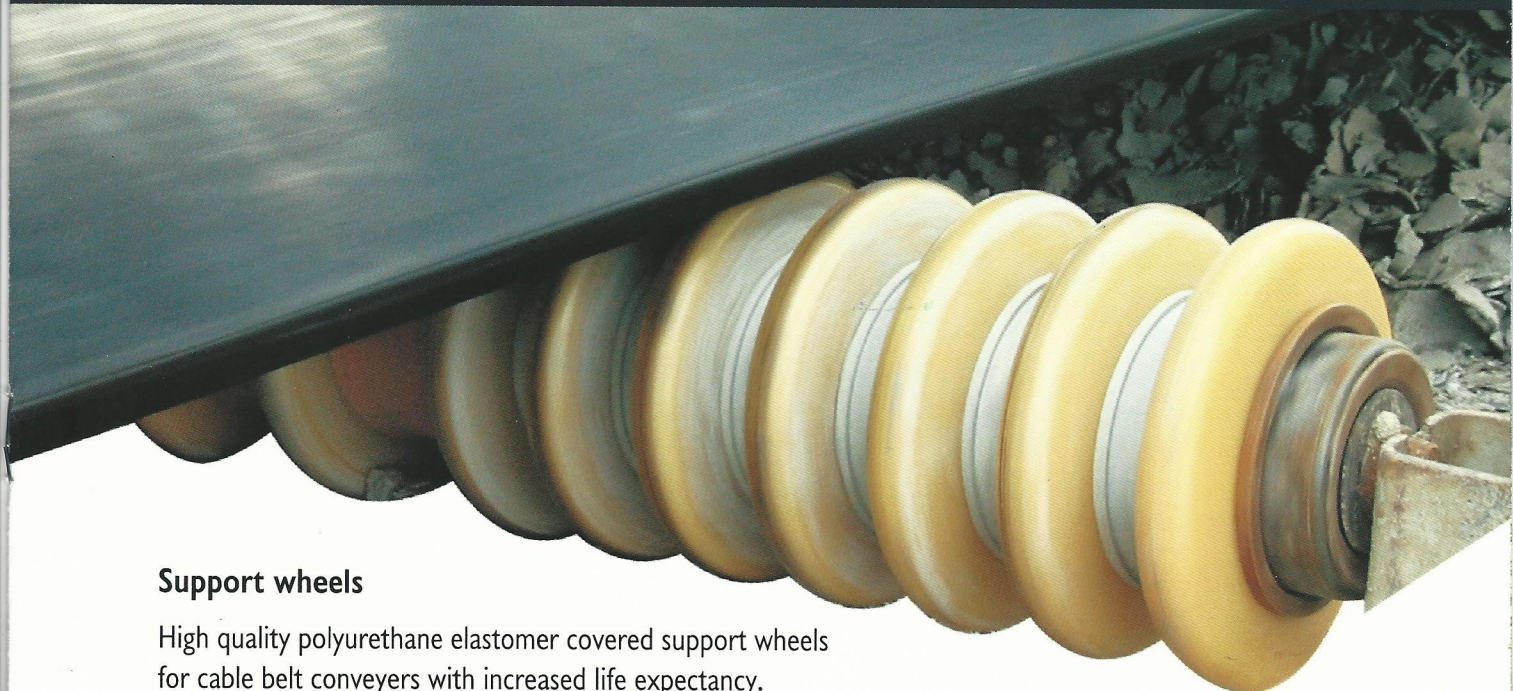

For over 20 years we manufacture premium quality doffers for JD and Case IH cotton pickers. Our doffers with the Ep logo have gained the trust from the most demanding farmers in the United States, Australia and Europe.

We meet your highest expectations!

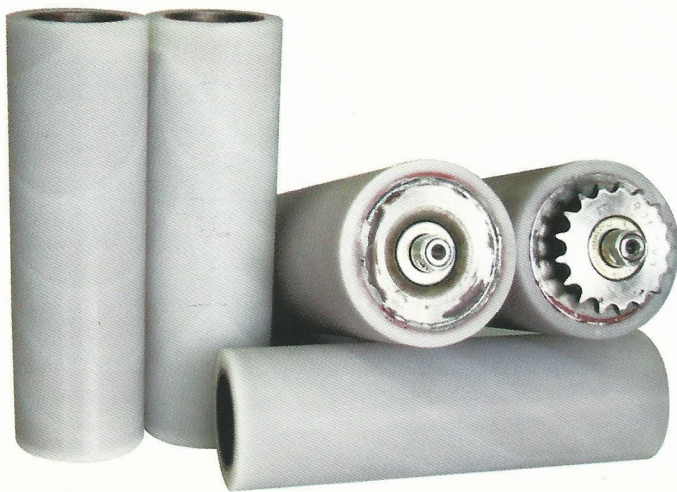

Mining industry Mining industry

Support wheels

High quality polyurethane elastomer covered support wheels for cable belt conveyers with increased life expectancy.

The quality of our wheels reduces the conveyor downtime during the replacement of the product and the noise level.

Rollers cover

Rollers covered with polyurethane elastomer exhibit high load bearing capacity and wear resistance.

They decrease abrasion and the noise level even in the most heavy loads and difficult areas.

Custom made parts

Taking advantage of the advanced technology and having the appropriate industrial equipment, we design and manufacture parts with the specifications that you will set in your order.

We can solve even the most difficult industrial problems.

The parts that can be manufactured through designing are:

- Scrapers
- Couplers
- Wheels
- Springs
- Parts for cotton pickers,
- Cylinders, sheets, idlers and much more...

Offshore Oil and Gas industry

Cable/Umbilical/Pipe Protection
